

AI Governance Platform

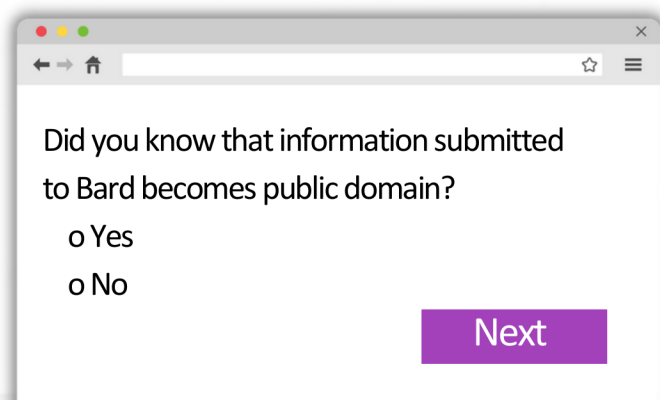

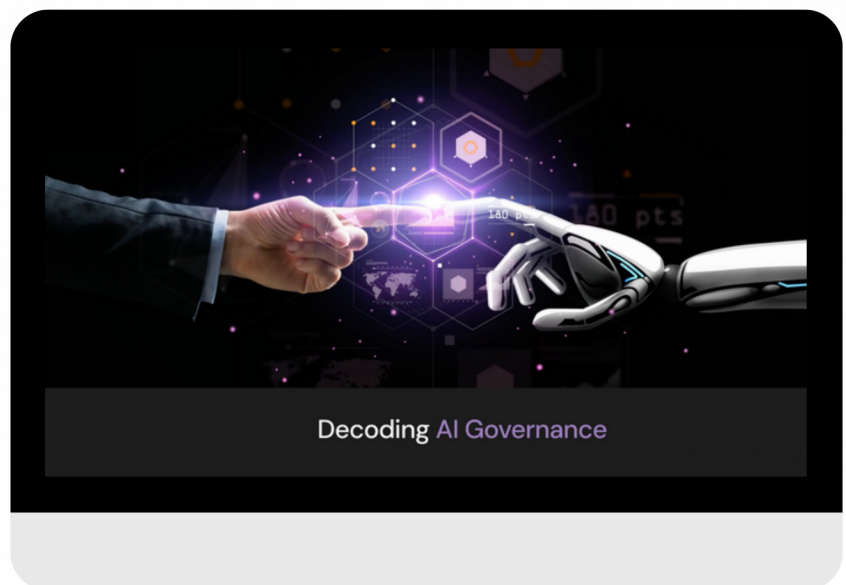

Providing training to your employees on the ethical & compliant use of AI

Training your employees on AI awareness and ethical usage is paramount to mitigating risks and extending governance beyond data privacy to AI. The Executive Order on AI released by the White House underscores the importance of training on AI with an emphasis on ethical usage, bias, and the potential for privacy violation. AI Governance Training by Truyo enables you to deliver effective and timely education to your employees on AI in this rapidly-evolving landscape.

AI Governance Training Topics:

- Tools
- Ethical Usage
- Use Cases
- Associated Risks
- AI Bias

The library of available trainings will be updated quarterly to keep current with emerging regulations.

Training can be provided through your LMS or the Truyo LMS.

Enterprise customization available.
